

Power BI Data Analyst Associate Certificate

Power BI certificate mind map

Flashcards easy

No	Question	Answer
1	In Power BI, which feature should be used when a text column (like Month Name) needs to follow a non-alphabetical sequence?	Sort by column
2	To sort month names correctly, what type of column is typically created to serve as the sort order reference?	A calculated column containing the month numbers.
3	What DAX function is used in the provided example to create a three-letter month name from a date field?	<i>FORMAT('DateDim'[Date], "MMM")</i>
4	Which specific icons appear in a visual header only if there are multiple fields in a field well or a hierarchy is present?	Drill down and expand down controls.

No	Question	Answer
5	In a hierarchical arrangement, what does clicking the 'trident' icon (Expand all down one level) accomplish?	It displays the next level of data while keeping the levels above it visible.
6	In a hierarchical arrangement, what is the result of clicking the 'double arrows' icon?	It displays the next layer of data by itself without showing the level above it.
7	Which icon is used to move from a lower level of a data hierarchy back to a higher level?	The drill up arrow.
8	What is the default interaction behavior between visuals on a Power BI report page?	Highlighting
9	How does the 'Highlighting' interaction mode visually distinguish data?	It grays back the color of data elements that are not relevant to the selection.

No	Question	Answer
10	Identify the three available modes for interactions between visuals.	Highlight, Filter, and None.
11	Which menu path is used to enable the manual customization of visual interactions in Power BI Desktop?	Format > Edit interactions
12	True or False: Visuals like maps typically support highlighting as an interaction mode.	False (they usually only support Filter or None).
13	When editing interactions, which visual must be selected first?	The source visual (the one being clicked by the user).
14	If a report page is performing slowly, what change to visual interactions might improve performance?	Disabling some or all of the interactions.
15	Term: Bookmark	A saved view of a report page that captures the state of filters, slicers, and visual properties.

No	Question	Answer
16	Which pane must be opened to create and manage bookmarks?	The Bookmarks pane (via View > Bookmarks).
17	After making changes to a page that you want a pre-existing bookmark to 'remember,' which command must you select?	Update
18	What is the purpose of the 'View' option in the Bookmarks pane?	It enables a presentation-like experience for cycling through saved states.
19	Which feature allows a developer to provide a group of buttons for all bookmarks without creating them individually?	Bookmark navigator button
20	In bookmark settings, what does the 'Data' option preserve?	The filtering and slicing selections active when the bookmark was created or updated.

No	Question	Answer
21	In bookmark settings, what does the 'Display' option preserve?	Visual properties such as spotlighting or visibility states.
22	If the 'Display' option is unchecked for a bookmark, what happens to the visual settings when that bookmark is selected?	The bookmark inherits the display settings from the previous view of the data.
23	Which pane is used to toggle the visibility of specific elements on a page, often in conjunction with bookmarks?	The Selection pane (via View > Selection).
24	In the Selection pane, what does the 'eye icon' represent?	The visibility status of a visual element (Show or Hide).
25	What is the purpose of the 'Layer order' in the Selection pane?	It determines the stacking order of visual elements (which objects appear on top of others).
26	What is the purpose of the 'Tab order' in the Selection pane?	It determines the sequence in which elements are selected when the user presses the Tab key.

No	Question	Answer
27	What is a major 'gotcha' when renaming a visualization directly in the Selection pane?	The new name will appear in the visualization's title on the report page.
28	Which menu path is used to combine multiple visual elements into a single block?	Format > Group
29	How do you activate a button to follow a bookmark link while working in Power BI Desktop?	CTRL + Click
30	What is the default source of information for a standard tooltip in Power BI?	The values of the fields used within that specific visualization.
31	How can a developer provide additional information in a tooltip without changing the primary visual?	By adding fields or measures to the 'Tooltips' field well.

No	Question	Answer
32	Why should a developer be judicious when adding many measures to the Tooltips field well?	Every measure requires calculation time, which can slow down report performance even if the tooltip is not viewed.
33	Where can a developer modify the background color and text font of a tooltip for a specific visual?	Format visual > General > Tooltips
34	What is a 'Tooltip Page'?	An entire hidden report page designed to appear inside a tooltip when a user hovers over a data point.
35	To use a report page as a tooltip, which setting must be toggled on under the 'Page information' menu?	Allow use as tooltip
36	What performance advantage do 'Tooltip Pages' have over adding measures to the 'Tooltips' field well?	Measures on a tooltip page are only evaluated when the user hovers over a data point.

No	Question	Answer
37	What is the required data condition for a tooltip to function correctly?	The fields or measures used in the visual and the tooltip must be related in the data model.
38	Which view mode is used to optimize a report for viewing on smartphones or tablets?	Mobile layout (via View > Mobile layout).
39	True or False: In Mobile layout, you must create separate layouts for every specific model of phone.	False (the view auto-adjusts to different device sizes).
40	Which license type supports only manual refreshes and no automated scheduled refreshes?	Free license
41	How many automated refreshes per day are allowed with a Power BI Pro license?	Up to eight

No	Question	Answer
42	How many automated refreshes per day are allowed with a Power BI Premium (per user or capacity) license?	Up to 48
43	In the Power BI Service, is a scheduled refresh configured on the 'Report' or the 'Dataset'?	The Dataset
44	Where in the Power BI Service settings can the scheduled refresh be configured?	Settings > Datasets tab > Scheduled refresh
45	What happens to a dataset's scheduled refresh if the refresh fails three times in a row?	The scheduled refresh is automatically turned off.
46	If the scheduled refresh options are grayed out in the Service, what does it typically indicate?	The Power BI Service cannot access the source data (often due to a firewall).

No	Question	Answer
47	What software component is required to allow the Power BI Service to connect to data stored behind an organization's firewall?	A gateway connection
48	Which gateway mode is specifically intended for data stored on an individual's local computer?	On-premises data gateway (personal mode)
49	Where can a user find the list of all gateways they have permission to use?	Settings > Manage gateways
50	What is the primary limitation of a Personal Gateway regarding device connectivity?	It is only active while the specific device it is installed on is online and connected.
51	What visual cue in the Workspace indicates a 'Manual refresh' button for a dataset?	The icon that looks like a circular arrow.

No	Question	Answer
52	What visual cue in the Workspace indicates the 'Scheduled refresh' shortcut for a dataset?	The icon that looks like a page with a refresh symbol (or a folder).
53	True or False: Power BI guarantees that a scheduled refresh will occur exactly at the minute specified.	False (Microsoft does not commit to the exact minute).
54	What setting allows you to choose who gets an email if a dataset refresh fails?	Send refresh failure notifications to
55	What is the recommended best practice when starting to build a set of bookmarks?	Create a 'Default View' bookmark first.
56	Which pane allows you to see the exact selection sequence for keyboard users on a report page?	The Tab order tab in the Selection pane.

No	Question	Answer
57	In Mobile layout, what tool is available to help developers align and lock visual elements precisely?	The grid
58	What is the result of applying a visibility change to a 'Group' in the Selection pane?	The visibility action is applied to all constituent elements within that group simultaneously.
59	Under which menu tab in Power BI Desktop can you find 'Mobile layout', 'Bookmarks', and 'Selection'?	View
60	In the context of visual drilling, which icon displays each layer of the hierarchy individually without the parent levels?	The double arrows icon.

No	Question	Answer
61	Which bookmark setting ensures that if a user changes the page before selecting the bookmark, the view switches back to the intended page?	Current page
62	How can you modify the size of the tooltip that appears when using a 'Tooltip Page'?	Set Canvas settings to 'Custom' on the tooltip page and adjust the height/width pixels.
63	What are the three main types of data gateways mentioned in the source?	On-premises, Personal mode, and Virtual network (VNet).
64	When using a Bookmark button, what is the 'Action' type automatically set to?	Bookmark
65	When choosing colors for a theme, why is it important to consider the 'Highlight' behavior?	Light colors may become difficult to see or read when they are grayed back during highlighting.

No	Question	Answer
66	If you want a bookmark to only affect specific visuals on a page rather than the whole page, which setting should be used?	Selected visuals
67	Which menu contains the 'Group', 'Bring forward', and 'Send backward' options for page elements?	Format
68	In the Power BI Service, where is the 'Refresh history' for a dataset located?	Under the Settings menu for that specific dataset.
69	True or False: A dataset must be stored in the same workspace as the report that uses it.	False
70	Which setting in the Scheduled refresh menu ensures calculations are performed relative to the user's local time?	Time zone

No	Question	Answer
71	Which icon in the visual header allows a user to expand a single data point in a hierarchy while keeping other data visible?	The Drill Down icon (single down arrow).
72	In the selection pane, what visual indicator shows that an element is currently hidden?	An eye icon with a slash through it.
73	Why might a report developer use a 'Blank button' instead of a 'Bookmark button' to trigger a bookmark?	To have more control over custom text and icons without the default bookmark symbol.
74	What is the primary benefit of using bookmarks to provide 'shortcuts' in a report?	It prevents report users from having to navigate through a large number of separate pages.
75	Which property in the Tooltips formatting section controls the transparency of the tooltip background?	Transparency (under Background).

No	Question	Answer
76	What is the 'Spotlight' feature's relationship to bookmarks?	Spotlight states can be saved in a bookmark if the 'Display' setting is enabled.

Flashcards medium

No	Question	Answer
1	Why might a report developer need to use the 'Sort by column' feature for a 'Month' column?	To ensure months sort chronologically by their numeric value instead of alphabetically by name.
2	In Power BI, what is the 'native' sorting behavior for a text-based month column?	Alphabetical sorting.
3	Which specific icons appear in a visual header only if multiple fields are present in a field well?	Drill down and expand down controls.
4	What is the function of the 'trident' icon in a hierarchical visual?	It expands all items to the next level of the hierarchy while keeping the levels above visible.
5	How does the 'double arrows' icon differ from the 'trident' icon in hierarchy navigation?	The double arrows show only the next level of the hierarchy and hide the level above it.
6	To navigate back to a higher level in a data hierarchy, which control should be used?	The drill up arrow.

No	Question	Answer
7	By default, what type of interaction occurs between visuals on a report page?	Highlighting.
8	The visual interaction mode that grays out irrelevant data points to emphasize selections is called _.	Highlighting
9	List the three available modes of interaction between visuals in Power BI Desktop.	Highlight, Filter, and None.
10	Which visual type is cited as one that cannot support highlighting, only filtering or no interaction?	Maps.
11	Where in the Power BI Desktop ribbon is the 'Edit interactions' feature located?	The Format contextual tab.
12	When 'Edit interactions' is enabled, where do the interaction icons appear for each visual?	In the visual header at the top or bottom right-hand corner.
13	In 'Edit interactions' mode, how does the user identify which interaction is currently active for a visual?	The icon for the current interaction mode appears darker than the other options.
14	True or False: Visual interactions must be reciprocal (e.g., if A filters B, B must filter A).	False.
15	What is a potential solution if report page performance is lagging due to complex visuals?	Disable some or all of the interactions between visuals.

No	Question	Answer
16	In Power BI report design, what is a bookmark?	A saved view of a report page.
17	Which pane must be opened to begin creating bookmarks?	The Bookmarks pane.
18	What is the primary purpose of the 'Update' option in the Bookmarks ellipsis menu?	To save recent changes made to the report page into an existing bookmark.
19	Which button type allows users to select or de-select bookmarks without creating individual buttons for each?	The Bookmark navigator button.
20	Which bookmark setting preserves the filtering and slicing selections made when the bookmark was created?	Data.
21	Which bookmark setting preserves visual states like 'Spotlight' or visibility?	Display.
22	What occurs if the 'Display' setting is unchecked on a bookmark?	The bookmark inherits the display settings (like spotlight) from the previous view instead of its original state.
23	Which pane is used to toggle the visibility (show/hide) of individual elements on a page?	The Selection pane.
24	How is an element made 'invisible' on the Selection pane?	By toggling the eye icon so it has a slash through it.
25	What is the risk of renaming a visualization element directly in the Selection pane?	The new name will appear as the title in the actual visualization.

No	Question	Answer
26	On the Selection pane, what does the 'Layer order' control?	The z-order arrangement of elements (placing shapes or visuals on top of each other).
27	What is the function of 'Tab order' on the Selection pane?	It determines the sequence in which elements are selected when a user presses the Tab key.
28	Which ribbon path is used to combine multiple visual elements into a single manageable block?	Format > Group.
29	What is a benefit of grouping elements on the Selection pane?	It allows a single action, such as hiding, to be applied to multiple elements at once.
30	When configuring a button to trigger a bookmark, which setting must be toggled 'On' in the Format button pane?	Action.
31	In Power BI Desktop, what keyboard shortcut is required to activate a button?	CTRL + click.
32	What is the standard behavior of a tooltip when hovering over a data point?	It displays the default values for every field used in that visualization.
33	How can a developer provide additional information in a tooltip without adding fields to the visual's primary axes?	Add the fields or measures to the 'Tooltips' field well.
34	Why should report developers be judicious when adding multiple measures to the 'Tooltips' field well?	Every added measure requires calculation time, which can slow down report performance.

No	Question	Answer
35	Where can the background color and text font of a standard tooltip be modified?	Format visual > General > Tooltips.
36	What is the first mandatory step to create a Tooltip Page?	Create a new page and toggle 'Allow use as tooltip' under Page information.
37	Under Canvas settings for a tooltip page, what is the 'Type' usually set to by default once allowed as a tooltip?	Tooltip.
38	Once a tooltip page is created, how do you link it to a specific visualization?	Go to the visual's Tooltips settings, set 'Type' to 'Report page', and select the specific page name.
39	What performance advantage do tooltip pages have over standard 'Tooltips' field well measures?	Measures on a tooltip page are only evaluated when the user actually hovers over a data point.
40	To design a report specifically for phone or tablet users, which view mode should be accessed?	Mobile layout.
41	In Mobile layout, how are visuals added to the mobile canvas?	By dragging them from the 'Page visuals' panel onto the mobile canvas.
42	True or False: In Mobile layout, formatting changes like turning off an X-axis only apply to the mobile view, not the desktop view.	True.

No	Question	Answer
43	Under a Power BI Pro license, what is the maximum number of scheduled data refreshes allowed per day?	8.
44	Under a Premium or PPU license, what is the maximum number of scheduled data refreshes allowed per day?	48.
45	True or False: Power BI automatically turns off a scheduled refresh if it fails three consecutive times.	True.
46	In the Power BI Service, are refresh schedules configured on the report level or the dataset level?	The dataset level.
47	What is the primary purpose of a Power BI gateway?	To enable the Power BI Service to connect to and refresh data stored behind an organization's firewall.
48	Which gateway mode is typically used for personal use to connect to data sources on a single computer?	On-premises data gateway (personal mode).
49	If the 'Scheduled refresh' menu in the Power BI Service is grayed out, what is the likely cause?	The Service cannot access the source data, likely requiring a gateway connection.

Flashcards hard

No	Question	Answer
1	Why would a report developer use the 'Sort by column' feature for a 'Month' field containing text names?	To ensure months are ordered chronologically by their corresponding number rather than alphabetically.
2	In which ribbon tab of Power BI Desktop is the 'Sort by column' feature located?	Column tools
3	What is the specific function of the 'trident' icon in a hierarchical visual?	It expands all items to the next level of the hierarchy while keeping the level(s) above visible.
4	How does the 'double arrows' icon differ from the 'trident' icon when navigating hierarchies?	The double arrows show only the next layer of data by itself, whereas the trident keeps the parent levels visible.
5	Which control is used to move from a lower level of a hierarchy back to a higher level?	The Up arrow (drill up control).
6	What is the default interaction behavior between two visuals on a report page?	Highlighting
7	Term: Highlighting (in visual interactions)	Definition: Graying out irrelevant data elements to emphasize values related to a selection in another visual.
8	What are the three available modes for visual interactions?	Filter, Highlight, and None.

No	Question	Answer
9	Which visual type is noted for not supporting the 'Highlight' interaction mode?	Maps
10	Where is the 'Edit interactions' toggle located in the Power BI Desktop ribbon?	Format tab
11	When 'Edit interactions' is enabled, where do the interaction icons appear for non-selected visuals?	In the visual header (top-right or bottom-right corner).
12	True or False: Visual interactions between two charts must be reciprocal (the same in both directions).	False
13	How do visual interactions impact the performance of a report page?	Multiple active interactions can slow down page performance.
14	Term: Bookmark	Definition: A saved view of a specific state or arrangement of a report page.
15	In which ribbon tab can a developer open the Bookmarks pane?	View tab
16	What action must a developer take after modifying a page to ensure an existing bookmark reflects those changes?	Select 'Update' from the bookmark's ellipsis menu.
17	What is the purpose of the 'Data' setting in a bookmark's options?	It preserves the filtering and slicing selections active when the bookmark was created or updated.

No	Question	Answer
18	What is the purpose of the 'Display' setting in a bookmark's options?	It preserves visual settings like visibility (Selection pane) and spotlighting.
19	What occurs if the 'Display' option is unchecked on a bookmark?	The bookmark inherits the display settings (like spotlighting) from the previously viewed state of the data.
20	Which feature allows users to navigate multiple bookmarks without creating individual buttons for each?	Bookmark navigator button
21	How can a developer access the presentation-like experience for bookmarks?	By selecting the 'View' option in the Bookmarks pane.
22	Which pane is used to toggle the visibility of specific elements on a report page?	Selection pane
23	What icon in the Selection pane indicates that a visual element is hidden?	An eye icon with a slash through it.
24	How can a developer modify the 'Z-order' (stacking order) of visuals on a page?	By adjusting the 'Layer order' in the Selection pane.
25	What is the purpose of the 'Tab order' setting in the Selection pane?	It determines the sequence in which elements are selected when a user presses the Tab key.
26	What is the prerequisite for activating the 'Group' feature for visual elements?	At least two visual elements must be selected first.

No	Question	Answer
27	What is a potential 'gotcha' when renaming a visualization in the Selection pane?	The new name will appear in the visualization's title if the title feature is enabled.
28	Which button type automatically sets its 'Action' type to 'Bookmark'?	Bookmark button
29	How do you activate a button while working in Power BI Desktop (developer mode)?	Ctrl + Click
30	By default, what information does a tooltip display when hovering over a data point?	The values for each field used in the visualization.
31	How can a developer add extra information to a tooltip without adding it to the chart's axes or legend?	Add the field or measure to the 'Tooltips' field well of the visual.
32	What is the performance drawback of adding many measures to a visual's Tooltips field?	Every measure requires calculation time, which can slow down the report even if the user doesn't hover over data.
33	Term: Tooltip Page	Definition: A hidden report page designed to appear as a custom, rich visual when a user hovers over a data point.
34	What setting in the 'Page information' menu must be toggled on to enable a tooltip page?	Allow use as tooltip

No	Question	Answer
35	Why is a measure in a tooltip page potentially better for performance than one in a standard tooltip field well?	The measure is only evaluated when the user hovers over a data point.
36	What is the requirement for a tooltip to successfully display data related to a visualization?	The fields or measures used in the tooltip and the visual must be related in the data model.
37	Where in the Power BI Desktop interface can a developer start designing for mobile devices?	View tab -> Mobile layout
38	True or False: A developer must create separate mobile layouts for every possible phone and tablet size.	False (the mobile view auto-adjusts to different devices).
39	How are visuals added to the mobile canvas in Mobile layout view?	They are dragged from the 'Page visuals' panel onto the mobile canvas.
40	How many scheduled refreshes per day are allowed with a Power BI Pro license?	Up to eight
41	How many scheduled refreshes per day are allowed with a Power BI Premium or PPU license?	Up to 48
42	True or False: A Power BI Free license supports automated scheduled refreshes.	False (it only supports manual refreshes).

No	Question	Answer
43	At what level is a data refresh configured: the report or the dataset?	The dataset
44	Where in the Power BI Service can the 'Scheduled refresh' menu be found?	Under the 'Datasets' tab of the 'Settings' menu.
45	What happens to a scheduled refresh if it fails three consecutive times?	The refresh is automatically turned off.
46	When is a data gateway required for a refresh in the Power BI Service?	When the data source is stored behind a firewall or is on-premises.
47	Which gateway mode is typically used to connect to data stored on an individual's local computer?	Personal mode (On-premises data gateway personal mode).
48	Where can a user view and manage all gateways they have access to in the Power BI Service?	Settings -> Manage gateways
49	What is a major limitation of a Personal Gateway regarding device connectivity?	It is only active while the device it is installed on is connected to the data source.
50	True or False: Datasets must be located in the same workspace as the report that uses them.	False
